-:- TISSUE SPECIFICITY: Olfactory neurons.
-:- SIMILARITY: Belongs to the cyclic nucleotide-gated cation channel (TC 1.A.1.5) family.
-:- SIMILARITY: Contains 1 cyclic nucleotide-binding domain.

Rediction of the coding sequences of mouse KIAA gene:

II. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA-homologous

III. the complete nucleotide sequences of 500 mouse KIAA

Sequence 16, Application US/08586670A

Sequence 16, Application US/08586670A

Patent No. 6241965

Patent No. 6241965

Patent INFORMATION:

APPLICANT: McBride, William

APPLICANT: Dean, Richard T.

TITLE OF INVENTION: Somatostatin Derivatives

TITLE OF INVENTION: And their Radiolabeled Products

NUMBER OF SEQUENCES: 23

CORRESPONDENCE ADDRESS:

ADDRESSEE: Banner & Witcoff, Ltd.

STREET: IO South Wacker Drive, Suite 3000

CITY: Chicago
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       COMPUTER READABLE FORM:

                                                                                                                                                                                                                                                                                                                       COTATION: (4)
COTHER INFORMATION: This is D-tryptophan
NAME/MEY: SITE
LOCATION: (8)
COTHER INFORMATION: This C-terminal residue ends with a hydroxyl
US-09-484-321-1
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         ö

TITLE OF INVENTION: NOVEL INDOCYANINE DYES
FILE REPERENCE: DNA STRING
CURRENT APPLICATION NUMBER: US/09/636,170
CURRENT PILING DATE: 2000-08-10
NUMBER OF SEQ ID NOS: 8
SEQ ID NO 1
NAME/KEY: SITE
LOCATION: (1)
COTHER INFORMATION: This is D-phenylalanine.
FEATURE:
NAME/KEY: DISULFID
LOCATION: (2)..(7)

Patent No. 6264399

GENERAL INFORMATION:
APPLICANT: Achilefu, Samuel
APPLICANT: Rajagopalan, Raghavan
APPLICANT: Bugaj, Joseph R.
TITLE OF INVENTION: NOVEL INDOCYANINE DYES
FILE REFERENCE: DNA STRING
CURRENT APPLICATION NUMBER: US/09/636,170
CURRENT APPLICATION NUMBER: US/09/636,170
CURRENT APPLICATION NUMBER: US/09/636,170

CURRENT PILING DATE: 2000-08-10

NUMBER OF SEQ ID NOS: 8

SOUTHWARE: PatentIN Ver. 2.1

SEQ ID NO 8

LENGTH: 8
                                                                                                                                                                                                                                                                                                                                                                                                                                                                       NAME/KEY: STTE

Sequence 640, Application US/09657276

Sequence 640, Application US/09657276

Patent No. 6887470

GENERAL INFORMATION:

APPLICANT: Conjuchem, Inc.

APPLICANT: Bridon, Dominique

APPLICANT: Bridon, Dominique

APPLICANT: Bridon, Dominique

APPLICANT: Hiner, Peter

APPLICANT: Hiner, Peter

APPLICANT: Thibaudeau, Karen

TITLE OF INVENTION: PETIDASE ACTIVITY THROUGH CONJUGATION TO BLOOD

TITLE OF INVENTION: COMPONENTS

TITLE OF INVENTION: COMPONENTS
